---

### SUMMARY

---

Flutter developer with 2 years experience in clean architecture, state management (Bloc, Provider, Riverpod), and RESTful API integration. Proficient in building scalable and maintainable mobile applications with a passion for UI/UX and performance optimization.

---

### EXPERIENCE

---

- |  |                   |
|--|-------------------|
| <b>Flutter Intern – PITS Company</b> <ul style="list-style-type: none"><li>Used Bloc, Riverpod, and Hive in scalable apps.</li><li>Built offline-first applications with dependency injection.</li></ul>                           | 02/2025 – 04/2025 |
| <b>Flutter Developer – Al-Hamss</b> <ul style="list-style-type: none"><li>Integrated REST APIs and implemented Provider for state management.</li><li>Built dashboards with performance tracking and clean architecture.</li></ul> | 05/2024 – 09/2024 |
| <b>Flutter Intern – Gaza Sky Geeks</b> <ul style="list-style-type: none"><li>Developed Firebase chat and email viewer.</li><li>Translated Figma designs into responsive UIs.</li></ul>   | 05/2024 – 05/2024 |

---

### EDUCATION

---

- |   |                                |
|---|--------------------------------|
| <b>Al-Azhar University</b><br><i>BSc in Software Engineering</i><br>I Graduated in 4 years (instead of 5) years with a GPA: 3.3 | gaza,<br>Palestinian Authority |
| <b>Egypt (Online)</b><br><i>Problem Solving Certificate</i><br>2021 – C++ training to build problem-solving and logic skills.   |                                |

---

### PROJECTS

---

- PailMail App**  
*Flutter, MVC, Provider, SharedPreferences, Localization, Routing, Responsive UI*  
Built an email viewer with categorized inbox, tag filters, and search functionality. • Implemented local search and save auth, animated widgets. • Integrated multi-language support (Arabic/English) using flutter\_localization.

## Quran App

*Flutter, Provider, API Integration*

Displayed dynamic content: random ayah, surah, or juz from a remote API. • Enabled user to choose audio reciter and stream playback. • Managed state cleanly using Provider.

## Car Dashboard App

*Flutter, Provider, Charts, Statistics, CRUD*

Created a dashboard for sellers to post cars and track performance metrics. • Displayed revenue and sales analytics using visual components • Implemented full CRUD operations and responsive layouts. Allowed sellers to view comments, sold cars, offers, and detailed car info.

## Betweener App

*Flutter, Api, Auth, UI from Figma*

Converted Figma designs into a real app with complete user flows. • Built authentication, friend follow system, profile view, and link sharing. • Integrated Firebase Auth and Firestore for user management and data.

## Chat App

*Flutter, Firebase, Firestore, Notifications*

Developed a real-time messaging app with Google/Facebook login. • Used Firestore for storing messages and Firebase Messaging for push notifications. • Designed chat UI and managed online/offline states.

## Recipe App

*Flutter, Bloc, Dio, Clean Architecture*

• Fetched recipes, categories, and meal details from API using Dio. • Built favorites system and search functionality with Hive for storage. • Applied Bloc for scalable state management and clean project structure.

## Vocabulary App

*Flutter, Hive, Cubit*

• Offline word management app: add, delete, and view saved vocabulary. • Utilized Cubit for state control and Hive for lightweight local storage. • Focused on quick performance and simple UX.

---

## SKILLS

---

### Language

Dart

### Frameworks

Flutter

### State Management

Provider, Riverpod, bloc

### APIs:

RESTful APIs, Dio, Http, JSON serialization

### Databases

Hive (No sql), SQLite, sharedpreferences

### Tools

Git, GitHub, Figma, Flutter DevTools

### Firebase

*Firestore, Storage, Cloud Messaging, Social Media Authentication (Google, Facebook)*

### Architecture

Clean Architecture, MVC, SOLID Principles

### Languages

Arabic: Native English: Intermediate ( B2 )

### Routing

Navigation 2.0
